Second World Summit for Social Development

Full Events Calendar on iPhone and Android

When looking for the Second World Summit for Social Development events via a smartphone, we recommend using the Teamup app instead of the mobile browser. The Teamup app provides smoother navigation and eliminates issues when viewing the Summit calendar on mobile browsers. Both iPhone and Android are supported. Getting started is easy!

Install **Teamup Calendar** by **Teamup Solutions AG** on your iPhone or Android smartphone.

Launch the app. You will be asked to “Please enter a calendar URL” on the “Connect a Calendar” prompt.

Copy and paste this calendar key: **ksjku4mxgkkv1dvbab**

Teamup will automatically prepend “<https://teamup.com>” before the key. Tap “Continue”. This will add ALL the events on the Summit. Select only the calendars relevant to you by **tapping the boxes on the left**.

You can also change the calendar view on the same menu. Please note Teamup is separate from your native Calendar app on your smartphone. Adding Teamup will not change other calendars. You can, however, copy a calendar entry from Teamup to your own calendar by opening an event in Teamup and tapping the “Share” icon. Then you can share to “Another calendar” (needs access to your native calendar) or “Another app” (like Outlook, GMail, etc).

Teamup also has a widget to accompany the app on iPhones. Visit: [Widget for the iOS App Available on App Store](#).

If you need any additional help with Teamup and what the app offers, view this article on Temup.com: [Additional help – Access to Teamup on Mobile Devices](#)
