From a Problem to a Masterpiece

We can't fight against Climate Change We must adapt to climate change

- ▶ Family and School are essential starting point to create strong awareness and sharing of the only possible goal: guaranteeing the best living conditions.

Securing the
territory, families
and businesses
from
hydrogeological
risk

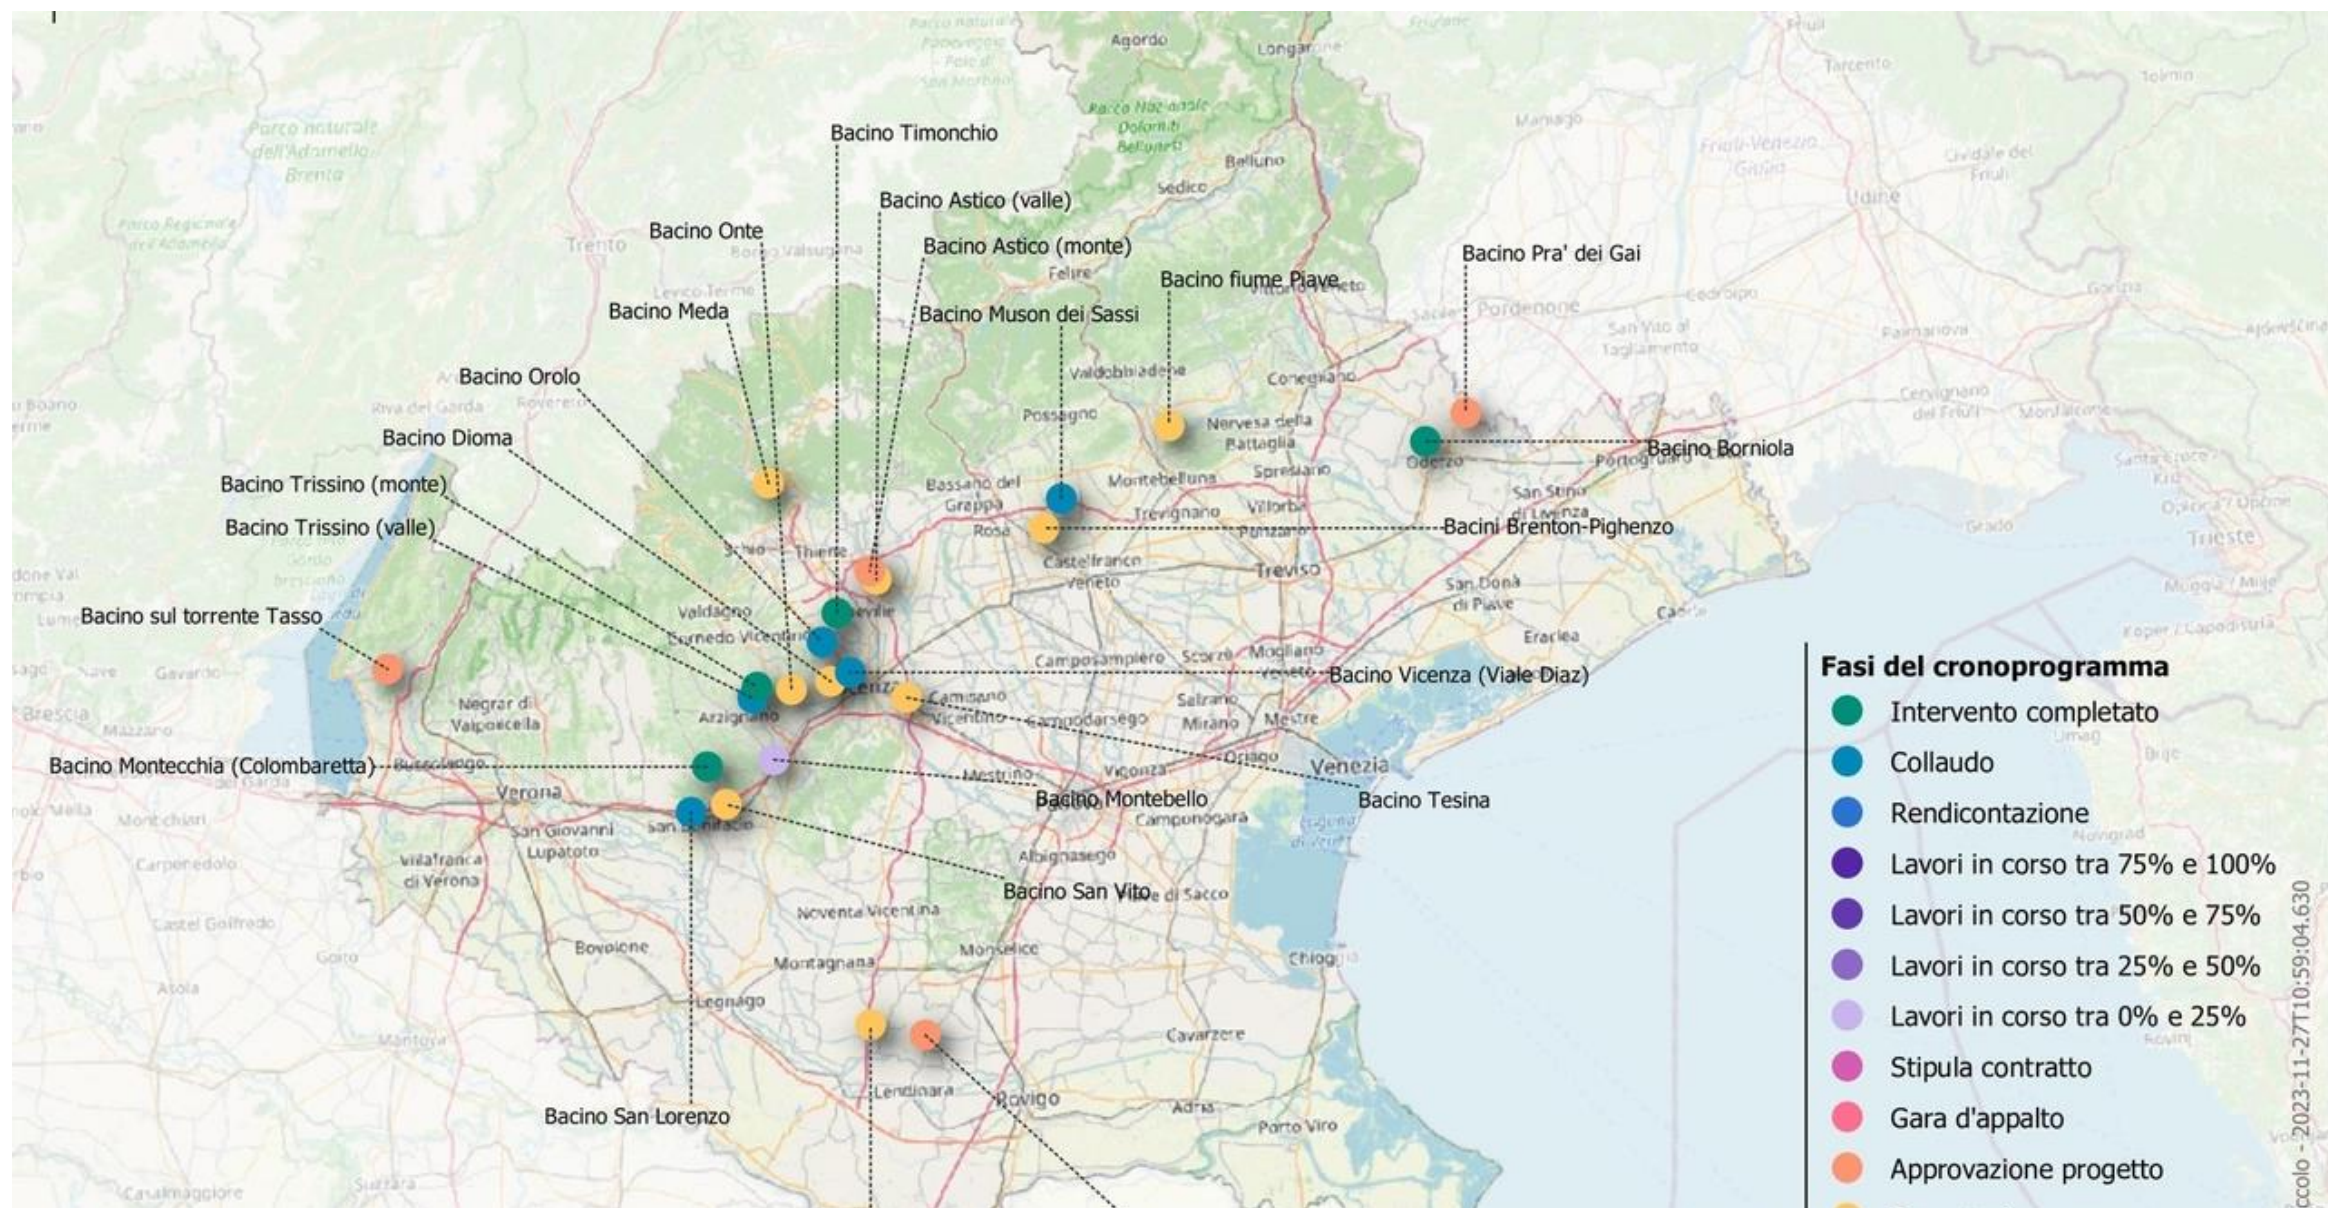

Experimental Electromechanical Module (MOSE) in Venice

project intended to protect the city of [Venice](#), Italy, and the [Venetian Lagoon](#) from [flooding](#).

- ▶ **To deal with floods, investments of around 600 million euros have been planned, with the already completed construction of 13 lamination basins and another ten underway. There have been 2,527 construction sites opened in just the last 3 years for all safety works including strengthening and upgrading embankments, which will see further investments of 50 million euros - all without raising taxes on citizens.**

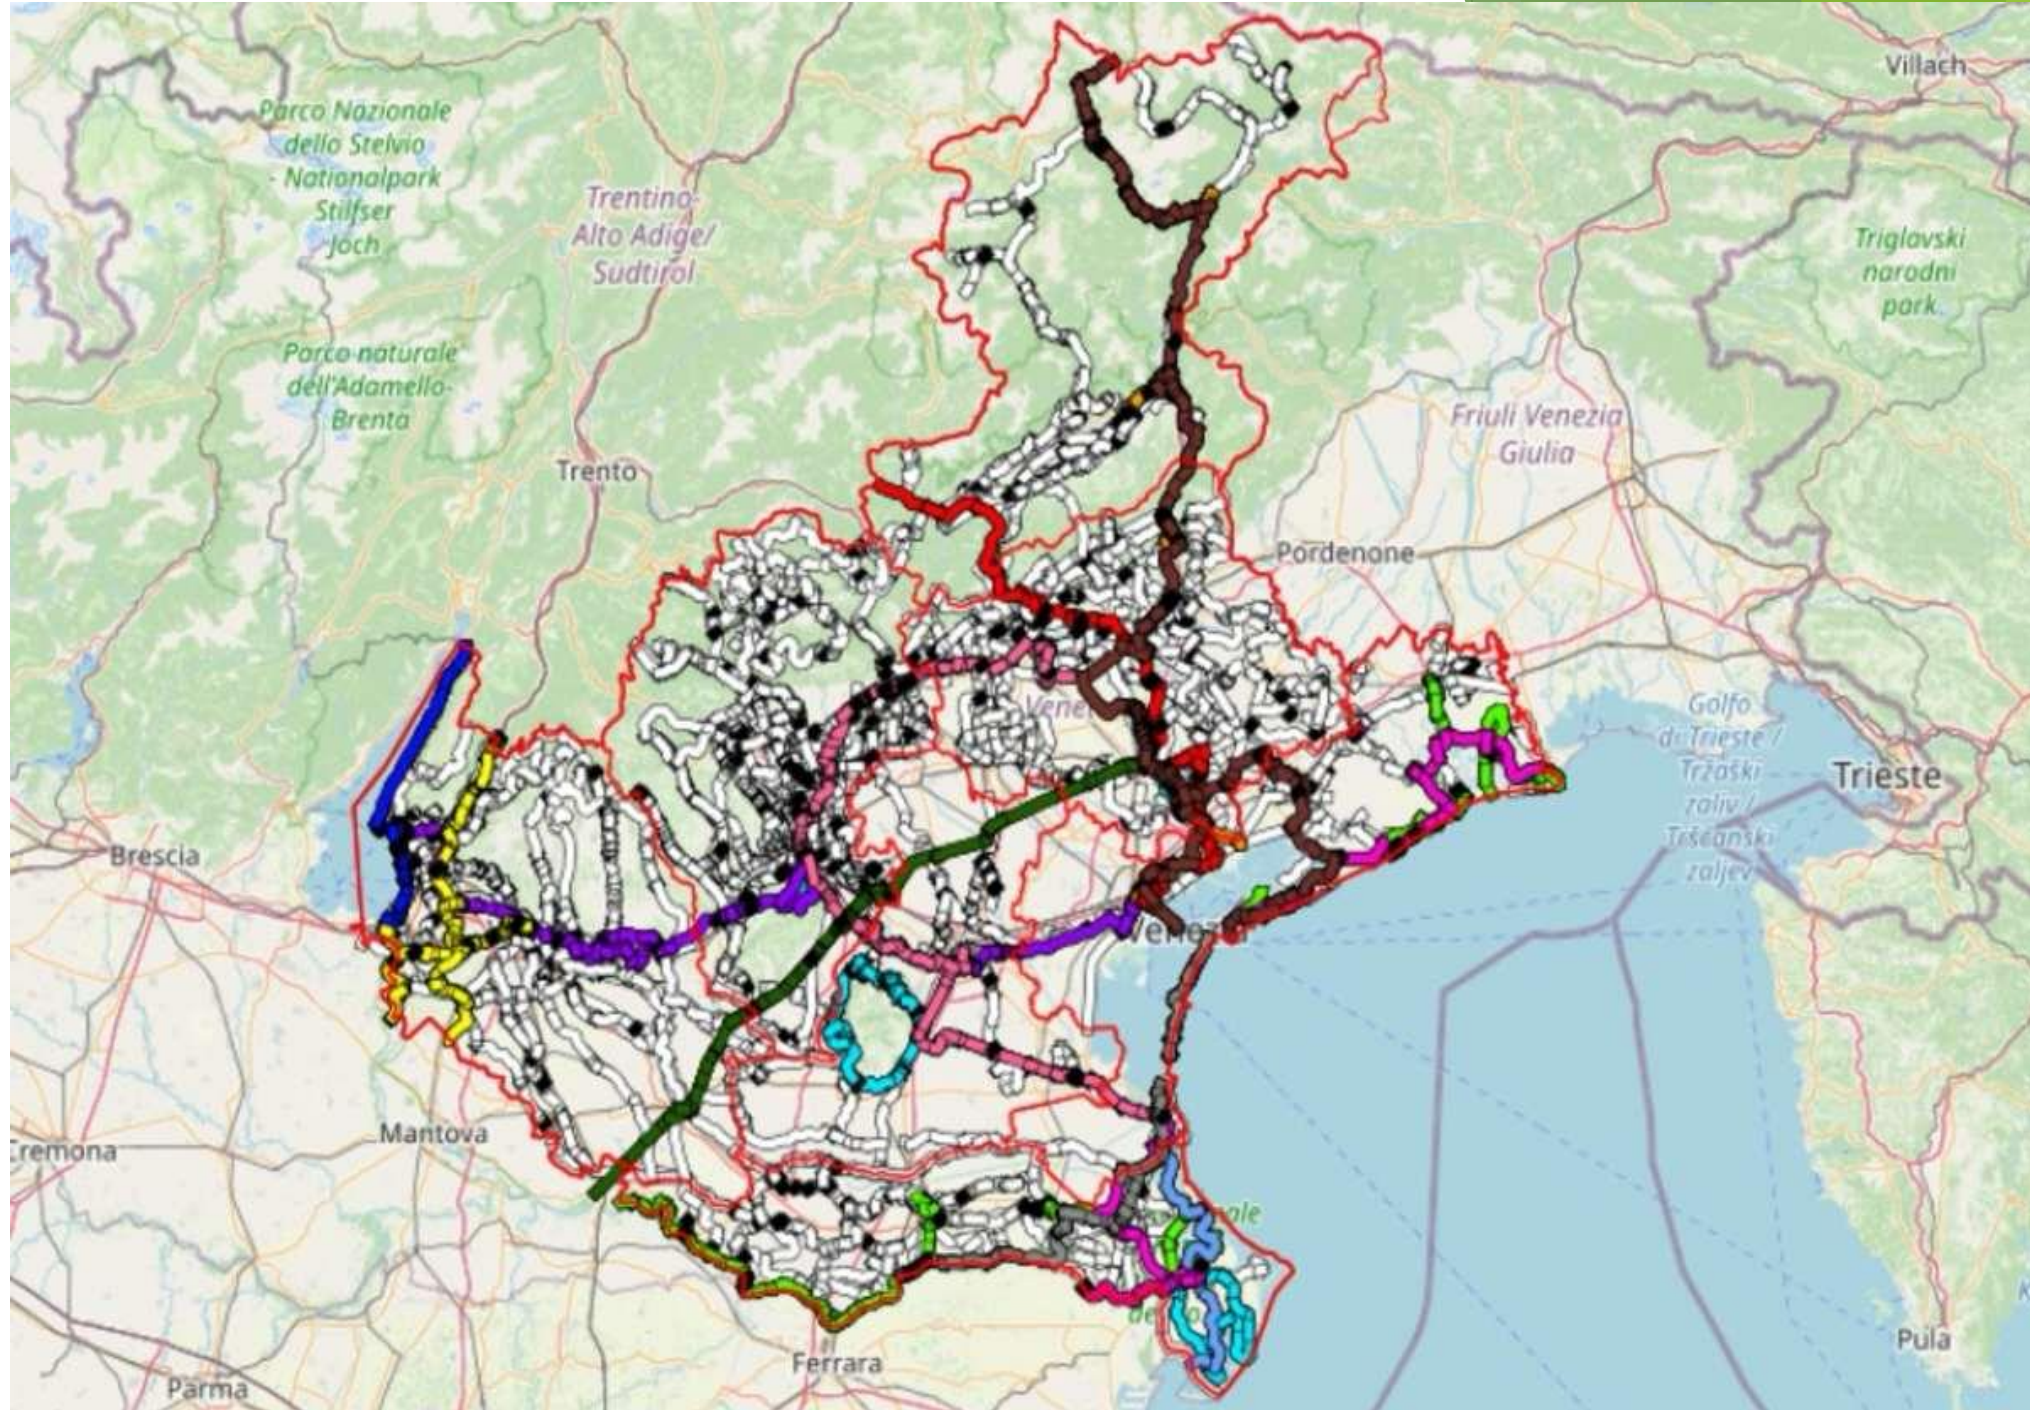

Social Housing

- ▶ an important factor in the identity of new residential models - housing increasingly aimed at ensuring eco-sustainable, highly energy-efficient homes with high social value,

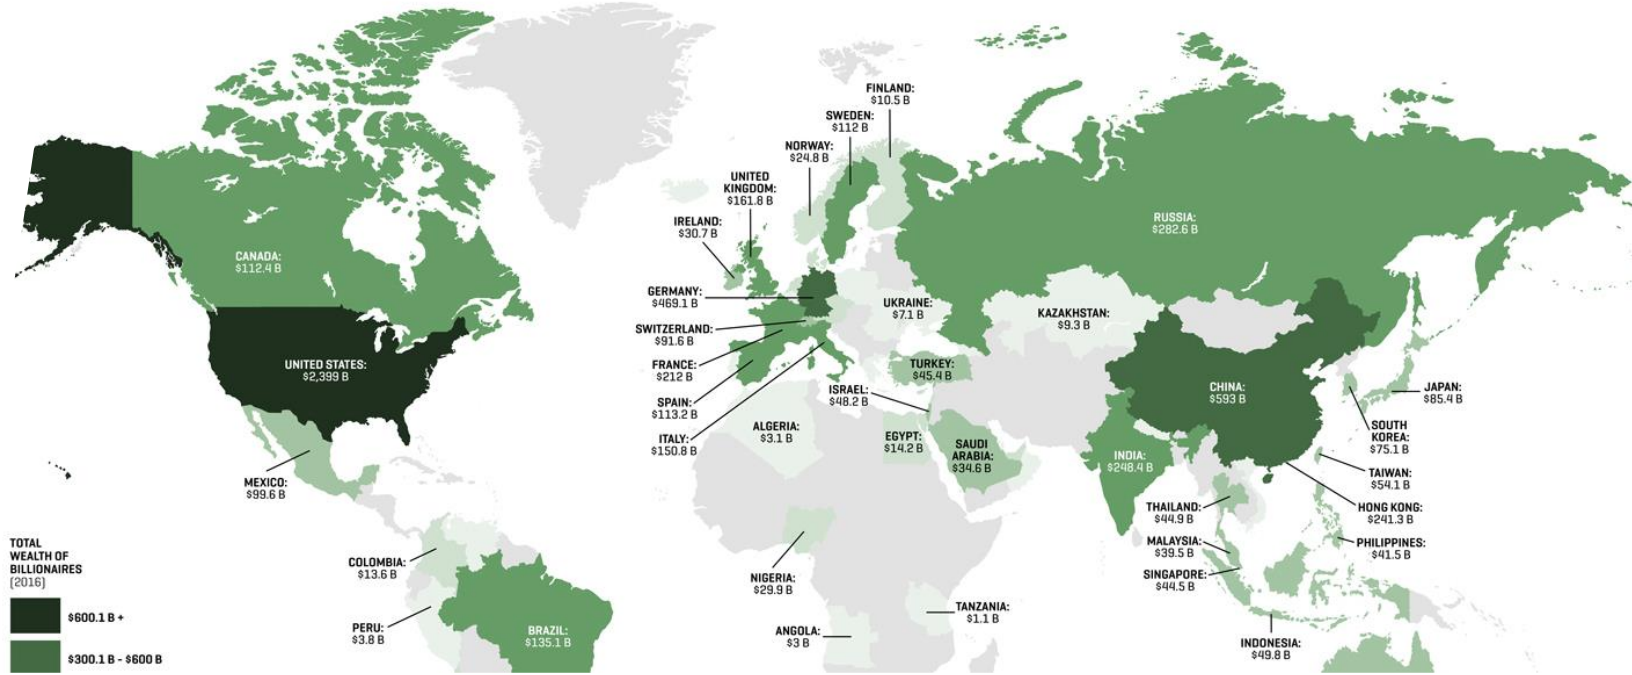

VENETO Cycle Path Plan

THE WORLD'S BILLIONAIRES

BY COMBINED NET WORTH PER COUNTRY [2016]

2,153 billionaires hold wealth greater than the assets of 4.6 billion people, or approximately 60% of the world population. Among other things, the assets of the 22 richest people exceed the economic resources of all women on the African continent.

WHO SHOULD PAY FOR CLIMATE CHANGE?
